

Cindra

Active Wear | Running | Trail | Athletics

Benvenuti nel catalogo di abbigliamento fitness e running di CINDRA Enterprises. In qualità di produttore specializzato in sportswear, streetwear e abbigliamento personalizzato, uniamo innovazione, artigianalità e moderne tecnologie di produzione per offrire prodotti di alta qualità a clienti in tutto il mondo. Grazie alla nostra esperienza nel settore tessile, CINDRA rappresenta il perfetto equilibrio tra qualità, prestazioni e affidabilità. Con il marchio CINDRA, ci impegniamo a garantire i più alti standard nell'abbigliamento fitness e running. Dalla selezione dei tessuti alla personalizzazione, dalla stampa al ricamo fino al packaging, ogni prodotto viene realizzato con grande attenzione ai dettagli e alla soddisfazione del cliente. Esplorate la nostra gamma e scoprite la qualità e la professionalità che definiscono CINDRA Enterprises.

Willkommen im Fitness- und Laufsportbekleidung-Katalog von CINDRA Enterprises. Als erfahrener Hersteller von Sportbekleidung, Streetwear und individuell angefertigter Kleidung vereinen wir Innovation, handwerkliche Präzision und moderne Produktionstechnologien, um weltweit hochwertige Produkte zu liefern. Mit langjähriger Erfahrung in der Textilherstellung steht CINDRA für die perfekte Verbindung aus Qualität, Leistung und Zuverlässigkeit. Unter der Marke CINDRA verpflichten wir uns, höchste Standards in der Fitness- und Laufsportbekleidung zu gewährleisten. Von der Stoffauswahl und individuellen Anpassung bis hin zu Druck, Stickerei und Verpackung wird jedes Produkt mit größter Sorgfalt und Liebe zum Detail gefertigt. Entdecken Sie unser Sortiment und erleben Sie die Qualität und Professionalität, die CINDRA Enterprises auszeichnen.

CINDRA Enterprises proudly welcomes you to our activewear and running apparel catalog. As a trusted manufacturer of sportswear, streetwear, and custom apparel, we combine innovation, craftsmanship, and modern production techniques to deliver premium-quality products worldwide. With years of manufacturing expertise and a commitment to excellence, CINDRA represents the perfect balance of creativity, performance, and reliability. Under the CINDRA name, we are dedicated to producing high-standard activewear and running apparel that reflects precision, durability, and style. From fabric sourcing and customization to printing, embroidery, and packaging, every product is crafted with attention to detail and customer satisfaction. Explore our range and experience the quality and professionalism that define CINDRA Enterprises.

POLYESTER, “FIBRE TO FIBRE” RECYCLING: IT CAN BE DONE!

From upstream to downstream, circularity in textiles is feasible.
Without compromises for the quality and technical performance of the products.

This fibre-to-fibre recycling initiative starts with recovered polyester waste, including post-consumer bottles and existing textile scrap. Specialized recovery technology breaks the material down and reconstructs into new textile fibre, refined step by step until the resulting yarn is composed entirely of recovered material - delivering a high-performance recycled polyester ready for technical sportswear.

Once scaled, this closed-loop system allows finished garments to themselves be recovered again at the end of their life, feeding the next generation of recycled fibre. Responsible sorting and processing practices at end-of-life moments is central to making this circularity real, turning textile waste into a resource rather than a burden on the planet.

Recycling has enormous potential in the fibre and textile sector. As this approach becomes standard across the industry, it marks an important step toward a more sustainable, circular future for sportswear manufacturing - reducing environmental impact while upholding the quality our customers expect.

Thanks to this project, the companies involved have proven the feasibility of circular economy and recycling projects, which make it possible to valorise materials that otherwise would be considered waste, reducing the environmental impact of the textile sector. A good result that demonstrates how combining different skills can contribute to a greater respect for the environment and to the construction of a future based on the circular economy.

Making textiles an increasingly sustainable sector is at the heart of our approach to circularity. This project brings together specialized recycling technology, quality yarn production, and technical apparel manufacturing - each contributing a different part of the process needed to turn textile waste into premium sportswear fabric.

Advanced recovery machinery identifies the best available technology for reclaiming polyester waste and converting it into a new textile fibre, without compromising technical performance.

Responsible collection and sorting of used garments and post-consumer materials feeds this recycling process with a steady, well-prepared source of recoverable textile waste - an essential step toward a genuine closed-loop system.

By combining these different areas of expertise, this initiative shows how circular economy principles can be applied at scale in the fibre and textile sector - reducing environmental impact while maintaining the durability and performance our customers expect from CINDRA apparel.

Certificato da ICEA
[GR0809]

Il Global Recycle Standard è promosso da Textile Exchange, una delle più importanti organizzazioni non-profit internazionali per lo sviluppo responsabile e sostenibile nel settore tessile. Lo standard riconosce l'importanza del riciclo per la crescita di un modello di produzione e consumo sostenibile, con l'obiettivo di favorire la riduzione del consumo di risorse (materie prime vergini, acqua ed energia) ed aumentare la qualità dei prodotti riciclati.

Il GRS prevede il rilascio di una dichiarazione ambientale verificata da parte terza che assicura il contenuto di materiali da riciclo dei loro prodotti, sia intermedi che finiti, il mantenimento della tracciabilità lungo l'intero processo produttivo, le restrizioni nell'uso dei prodotti chimici ed il rispetto di criteri ambientali e sociali in tutte le fasi della filiera produttiva dal riciclo dei materiali, alle successive fasi manifatturiere, fino all'etichettatura del prodotto finito. Le fasi che non rientrano nella certificazione sono la raccolta dei rifiuti, la cernita, selezione e raggruppamento. Possono essere certificati in base al GRS i prodotti e le attività manifatturiere.

Il Global Recycle Standard garantisce:
- Prodotti contenenti almeno il 20% di materiale da riciclo pre-consumo e post-consumo;
- Attività e processi manifatturieri attraverso i quali il materiale riciclato viene impiegato per realizzare prodotti intermedi (ad esempio: filati e tessuti) o prodotti finiti destinati al consumatore, che utilizzino modelli e procedure gestionali conformi ai requisiti fissati.

Der Global Recycle Standard wird von der Textile Exchange gefördert, einer der wichtigsten internationalen Non-Profit-Organisationen für eine verantwortungsvolle und nachhaltige Entwicklung im Textilsektor. Die Norm erkennt die Bedeutung des Recyclings für das Wachstum eines nachhaltigen Produktions- und Konsummodells an, mit dem Ziel, die Reduzierung des Ressourcenverbrauchs (neue Rohstoffe, Wasser und Energie) zu fördern und die Qualität der recycelten Produkte zu erhöhen.

Der GRS sieht die Ausstellung einer von Dritten geprüften Umwelterklärung vor, die den Gehalt an recycelten Materialien in Produkten, sowohl in den Zwischen- als auch in den Endprodukten, die Aufrechterhaltung der Rückverfolgbarkeit während des gesamten Produktionsprozesses, die Beschränkung des Einsatzes von Chemikalien und die Einhaltung ökologischer und sozialer Kriterien auf allen Stufen der Produktionskette vom Recycling der Materialien über die nachfolgenden Fertigungsstufen bis hin zur Kennzeichnung des fertigen Produkts gewährleistet. Nicht von der Zertifizierung abgedeckte Schritte sind die Abfallsammlung, Sortierung, Auswahl und Gruppierung. Produkte und Fertigungsbetriebe können nach GRS zertifiziert werden.

Der Global Recycle Standard garantiert:

- Produkte, die mindestens 20 % Pre-Consumer- und Post-Consumer-Recyclingmaterial enthalten;
- Fertigungstätigkeiten und -prozesse, bei denen Rezyklat zur Herstellung von Zwischenprodukten (z. B. Garne und Stoffe) oder Endprodukten für den Verbraucher verwendet wird, unter Verwendung von Managementmodellen und -verfahren, die den Anforderungen entsprechen.

The Global Recycled Standard (GRS) is promoted by Textile Exchange, one of the most important no-profit organizations that internationally promote responsible and sustainable development in the textile sector. With this standard, Textile Exchange recognizes the fundamental importance of recycling for the growth of a model of sustainable production and consumption; it aims to encourage the reduction of resource consumption (virgin raw materials, water and energy) and to increase the quality of recycled products.

The GRS provides for the issue of a third party verified environmental statement which proves the content of recycled materials of products (both intermediate and finished), the maintenance of traceability throughout the entire production process, restrictions on the use of chemicals, and compliance with environmental and social criteria at all stages of the production chain, from the recycling of materials, to the subsequent manufacturing stages, and the labelling of the finished product. Stages not covered by certification are waste collection, sorting, selection and grouping. Products and manufacturing activities can be certified according to the GRS.

The Global Recycle Standard guarantees:
- All products that are composed of at least 20% of pre-consumer and post-consumer recycled materials.
- Every manufacturing process through which the recycled material is used to make intermediate products (for example: yarns and fabrics) or finished products intended for the consumer.

La certficazione ISO 9001, norma internazionale per i Sistemi di Gestione per la Qualità (SGQ), pubblicata dall'ISO (International Organization for Standardization), attesta la realizzazione di prodotti conformi e di qualità, fornendo delle precise indicazioni che favoriscano lo sviluppo di un sistema di gestione per la qualità all'interno dell'organizzazione.

Die ISO 9001-Zertifizierung, eine internationale Norm für Qualitätsmanagementsysteme (QMS), die von der ISO (International Organization for Standardization) herausgegeben wird, bescheinigt die Herstellung von konformen und qualitativ hochwertigen Produkten und liefert genaue Angaben, die die Entwicklung eines Qualitätsmanagementsystems innerhalb der Organisation fördern.

The ISO 9001 certification, an international standard for Quality Management Systems (QMS), published by the ISO (International Organization for Standardization), certifies the production of compliant and quality products, providing precise indications that encourage the development of a quality management system within the organisation.

La certificazione SA8000 è lo standard di riferimento riconosciuto a livello mondiale nato con l'obiettivo di garantire ottimali condizioni di lavoro. La Certificazione Etica SA8000 risponde alle esigenze delle organizzazioni che intendono distinguersi per il loro impegno nello sviluppo sostenibile, con particolare attenzione alle tematiche sociali.

Die SA8000-Zertifizierung ist der weltweit anerkannte Referenzstandard mit dem Ziel, optimale Arbeitsbedingungen zu gewährleisten. Die Ethik-Zertifizierung SA8000 erfüllt die Bedürfnisse von Organisationen, die sich durch ihr Engagement für eine nachhaltige Entwicklung auszeichnen wollen, mit besonderem Augenmerk auf soziale Belange.

SA8000 certification is the globally recognised reference standard designed to ensure optimal working conditions. The SA8000 Ethical Certification meets the needs of organisations that intend to distinguish themselves for their commitment to sustainable development, with particular attention to social issues.

Reg. No.: 76R14593

La certificazione ISO 14001 rappresenta lo standard e il riferimento normativo per un "Sistema di gestione Ambientale" caratterizzato dallo sviluppo e dall'attuazione di una corretta politica ambientale e di una serie di obiettivi che impegnino l'organizzazione alla piena conformità di prescrizioni volontarie o dettate dal mercato di appartenenza.

Die ISO 14001-Zertifizierung stellt den Standard und die regulatorische Referenz für ein „Umweltmanagementsystem" dar, das durch die Entwicklung und Implementierung einer angemessenen Umweltpolitik und einer Reihe von Zielen gekennzeichnet ist, die die Organisation zur vollständigen Einhaltung freiwilliger oder vom jeweiligen Markt diktierter Anforderungen verpflichten.

ISO 14001 certification is the standard and regulatory reference for an „Environmental Management System" characterised by the development and implementation of a proper environmental policy and a series of objectives that commit the organisation to full compliance with voluntary or market-driven requirements.

Quando parliamo di riciclo, il nostro pianeta ha bisogno di azioni concrete. Questo principio lo possiamo applicare anche allo sport e nello specifico all'abbigliamento usato per l'attività sportiva. L'abbigliamento tecnico non deve diventare materiale di scarto e quindi rifiuto solido inutilizzato. I nostri tessuti ecologici e riciclati ECO sono la prova che è possibile agire per il bene del pianeta: sono sostenibili, ecologici, funzionali e Made in Italy.

Per poter produrre materiali riciclati, i rifiuti sotto forma di bottiglie di plastica PET vengono prima triturati in piccoli pezzi nell'impianto di riciclaggio e poi puliti. I piccoli pezzi vengono poi fusi ed estrusi in piccoli pellet. Da questi si produce il filato, che viene ulteriormente trasformato in tessuto. Infine, da questo tessuto si ottengono prodotti come maglie da ciclismo, running e tanti altri sport, il tutto costituito da bottiglie di plastica riciclate.

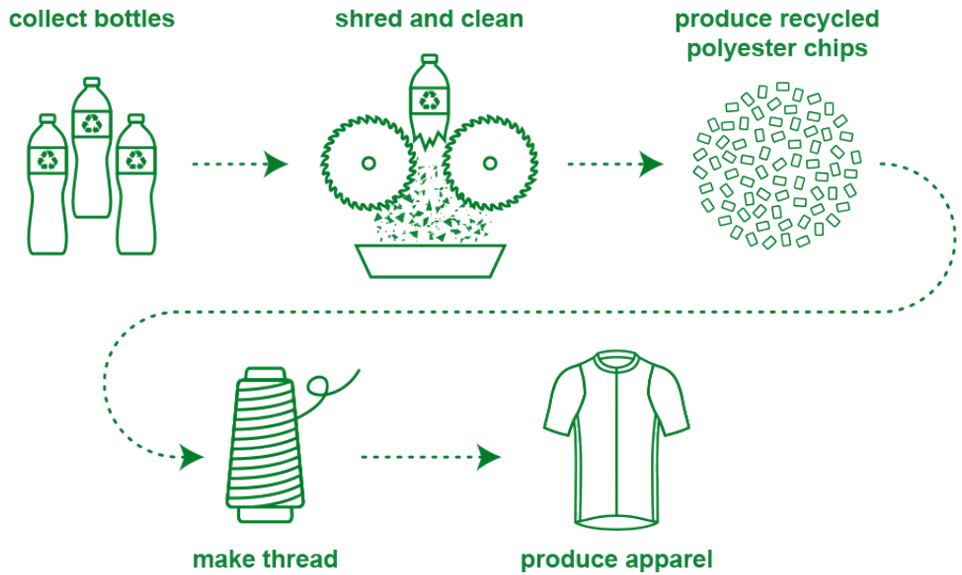

Unser Planet braucht konkretes Handeln. Wenn es um Recycling geht, lassen wir Worten Taten folgen. Technische Bekleidung sollte keine Belastung für die Natur darstellen. Unsere recycelten ECO-Stoffe sind der Beweis dafür, dass es möglich ist: nachhaltig, umweltfreundlich, funktionell und Made in Italy.

Um recycelte Stoffe herstellen zu können, werden zunächst Gebrauchsabfälle in Form von PET-Plastikflaschen in der Recyclinganlage in kleine Stücke zerkleinert und anschließend gereinigt. Die gereinigten Kleinteile werden dann geschmolzen und die dabei entstehende Masse wird durch Extrusion unter Druck in die gewünschte Form gepresst. Hieraus entsteht dann das Garn, welches zu Stoff weiterverarbeitet wird, aus welchem schließlich Produkte wie Radtrikots oder Laufshirts - bestehend aus recycelten Plastikflaschen – hergestellt werden.

Our planet needs action. When it comes to recycling we do not just talk the talk, but walk the walk. Technical apparel should not be a burden for nature. Our green, recycled ECO fabrics are the proof that it is possible: sustainable, eco-friendly, functional and Made in Italy.

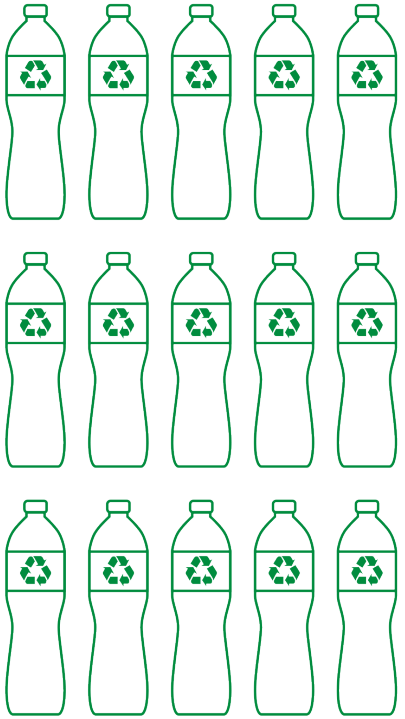

To be able to produce recycled materials, the waste in the form of PET plastic bottles is first shredded into small pieces in the recycling plant and then cleaned. The cleaned small parts are then melted and the resulting mass is pressed into the desired shape by extrusion. From this the yarn is produced, which is further processed into fabric. Finally, products such as cycling jerseys or running shirts - consisting of recycled plastic bottles - are made from this fabric.

PROCESS OF RECYCLING

CINDRA, consapevole del rispetto per l'ambiente, offre diversi tessuti „green". I tessuti provengono da filati riciclati, privi di sostanze chimiche nocive e in linea con le severe linee guida internazionali che si applicano a questo tipo di tessuti.

CINDRA nimmt den Umweltschutz sehr ernst. Wir bieten unseren Kunden deshalb verschiedene „green" Stoffe an. Diese wurden in einem energieeffizienten Prozess aus recycelten Stoffen hergestellt und sind frei von umweltschädlichen Chemikalien. Dies geshiet im Einklang mit den strengen internationalen Richtlinien, für diese Art von Stoffen.

CINDRA, aware of the respect for the environment, offers different „green" fabrics. The fabrics originate from recycled yarns, free from harmful chemical substances and in line with the strict international guidelines that apply to this type of fabrics.

Interlock Recycled

Composition:
100% Polyester
Weight: 120 g/m²

Interpower Recycled

Composition:
86% Micropolyester
14% Elasthane
Weight: 140 g/m²

Rudolf Recycled

Composition:
95% Polyester
5% Elasthane
Weight: 120 g/m²

Timor Recycled

Composition:
100% Polyester
Weight: 135 g/m²

LIGHT-WEIGHT

Eagle Print

Composition:
100% Polyester
Weight: 100 g/m²

Orange

Composition:
90% Polyester
10% Elasthane
Weight: 110 g/m²

Sushi

Composition:
100% Polyester Microfibre
Weight: 93 g/m²

Timor

Composition:
100% Polyester
Weight: 135 g/m²

Catkins

Composition:

Weight: 210 g/m²

Scotland Merino

Composition:
51% Polyester
41% Wool Merino
8% Elasthane
Weight: 130 g/m²

Per assicurare un utilizzo duraturo nel tempo dei nostri prodotti, si consiglia di:

1. NON lavare i nostri prodotti ad una temperatura superiore ai 30 gradi, evitare ammorbidenti, sbiancanti o detersivi aggressivi.

2. NON usare asciugatrici! Lasciate asciugare i prodotti naturalmente. Fate attenzione che luce solare diretta e le eccessive fonti di calore possono causare alterazioni dei tessuti.

3. NON stirare i nostri prodotti.

4. Se non siete sicuri della taglia, quando provate uno dei nostri campioni, scegliete quella leggermente più grande, poiché può variare a seconda dal peso e della costituzione. Notare che le nostre taglie sono soltanto un'indicazione.

5. Per evitare il deterioramento del tessuto:

- NON lasciare i capi per troppo tempo nel sacco della biancheria - lavarli subito dopo l'uso.

- NON lasciare i capi in un posto umido oppure in un sacchetto di plastica.

- EVITARE di entrare in contatto con velcro, che è causa di pilling
- L'uso di zaini può deteriorare il tessuto a causa di attrito.

6. Tutti i capi tecnici devono essere usati esclusivamente nella disciplina per cui sono concepiti, questo per utilizzare al meglio le caratteristiche tecniche dei tessuti con cui sono realizzati.

Um unseren qualitativ hochwertigen Produkten ein langes Leben zu sichern, bitten wir Sie folgendes zu beachten:

1. Waschen Sie unsere Produkte NICHT über 30 Grad Celsius, verwenden Sie milde Waschmittel und vermeiden Sie Weichspül- sowie Bleichungsmittel.

2. Trocknen Sie unsere Produkte NICHT im Wäschetrockner! Lassen Sie unsere Produkte vorzugsweise natürlich trocknen. Bitte beachten Sie, dass direkte Sonneneinstrahlung und exzessive Wärmezufuhr möglicherweise zu einer Beeinträchtigung der Stoffe führt.

3. Bügeln Sie unsere Produkte NICHT.

4. Sollten Sie bei der Musterprobe bezüglich Ihrer eigenen Konfektionsgröße unsicher sein, wählen Sie die nächstgrößere Größe, da die Kleidungsstücke abhängig von Körpergewicht und -bau anders sitzen können. Bitte beachten Sie, dass unsere Größenangaben nur als Anhaltspunkt dienen.

5. Um Stoffschädigung zu vermeiden:

- Lassen Sie die Produkte NICHT lange im Wäschekorb - waschen Sie sie gleich nach dem Gebrauch.

- Lassen Sie die Artikel NICHT an feuchten Orten oder in Plastiktüten liegen.

- Vermeiden Sie den Kontakt mit Klettverschlüssen, welche Pilling verursachen können.

- Das Tragen von Rucksäcken kann Reibung erzeugen und somit den Stoff beschädigen.

6. Alle technischen Kleidungsstücke dürfen nur in der Disziplin verwendet werden, für die Sie konzipiert sind, um eine bessere Nutzung der technischen Materialien zu gewährleisten.

To ensure a long life of our high quality fabrics, please consider the following:

1. Do not wash our products with temperatures above 30 degrees, use mild detergents, and avoid fabric softener and bleaching agents.

2. Do not use a dryer! Let our products preferably dry naturally. Please note that direct sunlight and direct heat may cause deterioration of the fabrics.

3. Do not iron our products.

4. If you are unsure of your own size when trying on one of our size samples, choose the slightly larger size , as fit can vary depending on body weight and build – please note that our sizes are just an indication.

5. To avoid fabric deterioration:

- Do not leave shorts in your laundry bag for a week - wash them straight after use.

- Do not leave our shorts in humid places or plastic bags.

- Avoid contact with velcro fasteners, which can cause pilling.

- The wearing of backpacks can generate friction and thus damage the fabric.

6. All technical garments must be used exclusively in the discipline for which they are designed in order to best use the technical features of the materials with which they are made.
